Montreal, QC | Open to Relocate Across Canada | ayushbadheka@gmail.com | +1 514-965-9513

QA Analyst with 3+ years of experience in mobile applications, kiosk-based systems, release validation, defect triage, test design, API testing, and backend data validation. Skilled in requirements analysis, functional, regression, UAT, exploratory, and workflow testing across large-scale production environments. Experienced in Jira/Confluence-based QA processes, defect lifecycle management, root cause analysis, stakeholder collaboration, and go/no-go release support. Leveraging AI-assisted QA workflows, Playwright, Postman, SQL, and CI/CD practices to accelerate test planning, automation, execution, and quality reporting.

QA & Release Support Engineer (BuyBack Booth, Montreal):

Jan 2023 – Ongoing

- Led QA validation, release support, and defect triage for mobile diagnostic applications and kiosk systems across a 2,500+ device environment.
- Developed an AI-assisted QA framework using MCP Playwright and AI agents to automate workflow discovery, test planning, test case generation, automation scripting, and reporting.
- Reviewed AI-generated test artifacts, validated coverage and quality, and executed Playwright test suites to support defect detection and regression testing.
- Executed functional, regression, UAT, exploratory, negative, and API testing to validate application workflows, backend services, and business rules.
- Verified application outputs, device diagnostics, backend records, and test data against acceptance criteria and expected system behavior.
- Investigated defects through issue reproduction, root cause analysis, regression validation, and cross-functional collaboration with development teams.
- Managed Jira for defect lifecycle management, sprint support, release tracking, documentation, and stakeholder reporting.
- Partnered with clients, product, and development teams to clarify requirements, mitigate release risks, and support go/no-go decisions.
- Identified workflow, usability, and process improvement opportunities through defect trend analysis, production feedback, and user observations.
- Applied exploratory and negative testing to uncover edge cases, workflow interruptions, unexpected user behavior, and stability issues.
- Performed AWS production release support, including EC2 storage checks, EBS gp2/gp3 volume modifications, pre-change validation, rollback evidence capture, and SSL certificate renewal support.

Helpdesk Support Technician (Pooja Interiors Limited., India):

Jun 2021 - Dec 2022

- Delivered Level 1 technical support for Windows users, resolving hardware, software, printer, and wired/wireless connectivity issues.
- Administered Active Directory tasks including user account updates, password resets, permissions, shared drive access, and GPO's.
- Configured desktops and laptops with operating system updates, standard applications, and user-specific settings.
- Supported end users with printer setup, shared drive mapping, and access to internal network resources.
- Maintained inventory records for IT assets including workstations, mobile devices, peripherals, and networking equipment.
- Documented support requests, troubleshooting steps, and resolutions in internal ticketing and documentation systems.

TECHNICAL SKILLS:

QA & Testing: AI Assisted, Functional Testing, Regression Testing, UAT, Release Validation, Test Case Design, Defect Triage, Bug Reporting, Root Cause Analysis, API Testing, Backend Validation

Systems & Analysis: Requirements Analysis, Client Requirement Gathering, Workflow Validation, User Stories, Acceptance Criteria, Process Improvement, Stakeholder Communication, Release Readiness

Tools & Platforms: Jira, Confluence, Postman, Microsoft 365 Admin, Azure AD / Entra ID, Windows, Excel, GitHub

EDUCATION:

Concordia University Montreal - Information Systems

University of Mumbai – Bachelors of Science in Computer Science
